# Instructional Design Process

Instructional Designer   Subject Matter Expert
COLLABORATION

Determine Needs & Audience

1

Course/Unit/Lesson Description
Course/Unit/Lesson Sequence
How will this course/unit/lesson be delivered?

2

Create Objectives

What should the student know/do by the end of the course/unit/lesson?

Design Summative Assessment(s)

3

How will the objectives be assessed?

4

Develop Formative Assessment & Assignments

How will formative assessments and assignments scaffold student learning?

Determine Necessary Resources

5

What resources will students need to achieve objectives?

6

Implement Design

What needs to be created to deliver this course/unit/lesson to students?

Evaluate Results

7

How well did students achieve objectives?
